Before starting bladder emptying you should always consult a doctor or a nurse to get proper instructions in use.

**Play and learn**
As your child develops, he will want to become more independent. This is a natural part of growing up. He may already show signs of wanting to take control of his own life – including his toilet habits. Encouraging him in this will make it easier for your child to be with other people as he grows up.

So when you feel your child is ready, you can start teaching him about going to the toilet and emptying his bladder. The Wee Game™ has been designed to help you and your child do this in a fun way. It’s simple to use and as your child gets the hang of it, it’s easy to make it more challenging. Have fun!
Tips for parents

Believe in him
Your child knows when you have confidence in him. Show him that you believe he can do it himself.

Be patient
It takes time to learn to empty the bladder. But it is worth spending some extra time so he can learn to do it properly.

Encourage him
Help your child by being positive. Praise him when he gets it right and gently remind him if he forgets something or does it wrong.

Learn what to do
Before you can teach your child how to empty her bladder, you need to be fully comfortable doing it yourself.
What is the Wee Game™?

The Wee Game™ is a set of cards that you can use to teach your child how to empty his bladder. The cards can be used to play different fun games that can be adapted to suit his age and level of ability.

**Game content**
The game consist of three sets of 9 matching cards and a card holder booklet.
9 picture cards
Simple drawings that show each step in the bladder emptying procedure.

9 situation cards
Simple explanations of each step to match the picture cards.

9 question cards
Questions about why it is important to do each step.
How to play The Wee Game™

Beginners
The right order game
Show him the picture cards and talk about each step. Try and arrange the picture cards in the right sequence.

Tips
- Start with 1-2 steps
- When he understands the steps, put the cards in the wrong order
Intermediates

The matching game

When you feel your child understands the sequence of the different steps you can try a new game.

Match each situation card with the right picture card.

Example:

Situation card: “It is important not to spread germs when doing a wee.”

Picture card match: “Hand wash.”

Tips

- You can either read the situation cards aloud or let your child read them himself
- Choose the situations which your child finds difficult
- Make the game more interesting by suggesting wrong combinations
- Make it easier by showing your child 2 or 3 possible matching cards, where only 1 is right
How to play The Wee Game™

**Experienced**

Quiz game

When your child can match the picture cards with the situation cards you can introduce the question cards. Ask your child the question on the question card. He then has to find the right answer on the picture card and situation card.

**Example:**

**Question card:**  "Why should you wash your hands after doing a wee?"

**Right answer:**  Situation card: “It is important not to spread germs when doing a wee” and picture card: “Hand wash.”
Tips

• You can either read the situation cards aloud or let your child read them
• If your child can read, you can make the game more difficult by introducing the situation card first and ask for a matching question
• Choose the situations which your child finds difficult
• Make the game more interesting by suggesting wrong combinations
• Make it easier by showing your child 2 or 3 possible answer cards, where only 1 is right
How to play The Wee Game™

Cardholder booklet

When you find it relevant, you can create a personalised step-by-step guide for your child using the picture cards and the cardholder booklet.

Tips

• Celebrate this new stage in her development with a treat or reward
• Personalise the booklet by colouring the pictures or adding some stickers
**Step 1**

**Picture card:** Show SpeediCath catheter + soap + cotton wool pads gathered together in an orderly fashion.

**Situation card:** “It makes it easier if you have what you need before you do a wee.”

**Question card:** “Why is it important to start by getting everything you need?”

**Step 2**

**Picture card:** Show Hand wash.

**Situation card:** “It is important to have clean hands before you do a wee, so you don’t get germs in your bladder.”

**Question card:** “Why should you wash your hands before you wee?”

**Step 3**

**Picture card:** Show opening of the SpeediCath catheter pack.

**Situation card:** “Hang the pouch somewhere you can easily reach it. Open the pouch by pulling the ring.”

**Question card:** “What should you do with your catheter before you start to wee?”
Step 4
Picture card: Picture of a boy, standing next to the toilet, underwear down.
Situation card: “Stand comfortably next to the loo. This makes it easier for you to be ready to do a wee.”
Question card: “Where should you stand when getting ready to do a wee?”

Step 5
Picture card: Show washing male genitalia.
Situation card: “Washing your willy before doing a wee gets rid of germs.”
Question card: “Why should you wash your willy before doing a wee?”

Step 6
Picture card: Show insertion of SpeediCath into male genitalia (urethra) (incl. an arrow pointing inwards).
Situation card: “Slide in the catheter slowly and gently into the hole in the tip of your willy until the wee starts to come out. Then push it in a little bit more.”
Question card: “How do you make the wee come out?”
Step 7
Picture card: Same illustration as step 6, but with an arrow pointing outwards.
Situation card: “Pull out the catheter slowly. Stop if more urine comes out.”
Question card: “How do you pull out the catheter?”

Step 8
Picture card: Hand wash.
Situation card: “It is important not to spread germs after you do a wee.”
Question card: “Why should you wash your hands after a wee?”

Step 9
Picture card: Happy boy.
Situation card: “Well done – you have done a wee all by yourself!”
Question card: “Why should you feel proud of yourself?”
At www.coloplast.com you will i.e. find an animated instruction on how your child should catheterise himself.
