The fit is the difference

For more than 60 years, Coloplast has been developing products and services to make life easier for people with personal and private medical conditions.

SenSura[®] Mio ostomy appliance with its elastic adhesive is a milestone in our mission.

Leakage is the number 1 problem

Leakage is the number one problem for all people with a stoma.1

Poor appliance fit to body is the main cause of leakage and skin irritation. Getting a secure fit is therefore key to preventing leakage and skin issues.

The right fit makes all the difference

Finding the right fit is an important part of improving stoma-related quality of life. However, body shapes, stomas and the location of the stoma opening vary greatly from person to person. These factors can make it hard to find the right fit for a patient's body profile.

Users can be divided into three distinct body profiles.

Introducing SenSura[®] Mio with BodyFit Technology[®]

A common fit challenge for users with regular body profiles is securing a good fit that supports users' lifestyles, even physically active ones with their associated abdominal movement.³

SenSura® Mio's unique elastic adhesive follows body movements. Whether the patient is bending down, stretching or twisting, this appliance maintains a secure fit.

The baseplate is designed with BodyFit Technology that secures the right fit for your patient's body, no matter their body shape and specific challenges.

The science behind SenSura® Mio elastic adhesive

A special blend of hydrocolloids, polymers and tackifiers are the main ingredients of the SenSura Mio elastic adhesive formula.

- 1 Special blend of hydrocolloids, polymers and tackifiers
- 2 Elastic topfilm

Thanks to **BodyFit Technology**®, the baseplate can bend and stretch with the body while maintaining a secure fit to the skin.

2x more stretchable than a conventional appliance⁵

3 more reasons why SenSura[®] Mio is a great choice for your patients

Discreet bag colour

The all-textile material in specially chosen, neutral colours is designed to be unnoticeable, even under white clothing.

A filter you can trust

A unique, full-circle filter provides greater protection against ballooning.

Proven to reduce incidents of ballooning by 61 %

A choice of couplings

Click coupling has a lock ring designed for reassurance and a feeling of security. An audible 'click' confirms when the lock ring is correctly locking the bag to the baseplate.

For more than 60 years, Coloplast has been developing products and services to make life easier for people with personal and private medical conditions.

SenSura[®] Mio ostomy appliance with its elastic adhesive is a milestone in our mission.

Introducing SenSura[®] Mio with BodyFit Technology[®]

Some fit challenges for users with inward body profiles include:

- Stomas are commonly level with or below skin surface²
- High risk of leakage (84%)²
- Traditional convex appliances can feel bulky and stiff³

For too long, it has been accepted that finding a more secure convex appliance means settling for less flexibility.

SenSura® Mio Convex provides flexibility for people with stomas that are retracted, flush or in an inward area – without compromising security.

Traditional appliances
Potential leakage

SenSura[®] Mio Convex comes in three variants: **soft, light** and **deep**. The deep Convex is twice as flexible as a traditional light Convex.⁴

86%
Assessed the level of comfort when wearing the baseplate as good or very good⁵

Proven security for inward areas

The SenSura® Mio Convex adhesive features BodyFit Technology – an adhesive technology that secures the right fit for every body, no matter their body shape and challenges.

The adhesive's patented, integrated flexlines give the flexibility needed for comfortable bending, without compromising on stability.

The material in the flexlines is slightly thinner than the surrounding material, and their pattern ensures the convex bends around the stoma – not in the middle of it.

2x Even the deep convex is twice as flexible as the traditional light convex⁴

Sensura[®] Mio the fit is the difference

Introducing Coloplast® Baby

Long wear time – less disturbance

Coloplast®Baby

The first appliance designed specially for premature babies and infants

Coloplast® Baby is a twopiece appliance. It features an elastic adhesive that balances the pH level of the skin and a sterile ostomy bag. Crucially, it provides a secure fit to body and is skin-friendly.

Coloplast Baby

- Benefits for professionals

Coloplast Baby is designed to ease your daily practice and:

- Reduce the time spent handling the infant
- Minimise disturbance for the infant
- Makes it easier to meet individual needs (no starter hole)
- Enable access to the stoma for refeeding

Additional infant-friendly features

Elastic adhesive

Coloplast Baby is designed to fit individual body profiles and cover multiple stomas. Brava® Baby Adhesive Remover shall be used when changing the adhesive.

Soft flange

The coupling system includes a soft flange so the bag can be attached to the baseplate with little pressure on the abdomen.

Soft, easy-to-use outlet

The outlet is compatible with enteral syringes for easy emptying while the soft material is gentle on baby skin.

Refeeding window

The first dedicated refeeding window on an ostomy appliance for easy facilitation of refeeding and access to the stoma, for less disturbance of the baby.

Introducing Coloplast® Kids

So kids can move like kids

Coloplast[®] Kids

The first appliance designed specially for kids

Coloplast[®] Kids features an elastic adhesive, enabling it to adapt to individual body movements. It's available in both a 1-piece and 2-piece solution.

Additional kid-friendly features

Star-shaped elastic adhesive

The adhesive is skinfriendly and star-shaped with special petals designed to hug kids' small, round bellies while giving more flexibility in terms of placement on the abdomen.

Fit zones

Special fit zones in the rim and centre of the appliance increase its flexibility around the stoma for optimal range of movement.

Unique, full-circle pre-filter

This specially developed feature is proven to postpone clogging. It also reduces incidents of ballooning by 61%.¹

Discreet material

Coloplast® Kids features a neutral-coloured, water-repellent, comfortable textile for a non-medical, discreet appearance.

SenSura

Dual protection
- less leakage,
healthier skin

Double-protection adhesive

Ostomates need an appliance that provides optimal security and skin protection. With SenSura® they have a solution they can trust.

The unique SenSura® double-layer adhesive protects the peristomal skin

throughout the entire wear time.

Protection layer

- Strong erosion-resistant adhesive protects against stoma effluent
- Creates a tight seal between adhesive and stoma

- Absorbs excess moisture to keep peristomal skin healthy
- Ensures consistent adhesion

Together the two layers of the double-protection adhesive offer security and skin care

Protects against stoma output

Two variants of the double-protection adhesive

SenSura®

The original adhesive for optimal skin friendliness.

For extra protection against aggressive output.

The combination of nursing care and SenSura® double-layer adhesive is proven to:

- Reduce incidents of leakage
- Improve peristomal skin conditions
- Improve quality of life

SenSura® Closed Bags

SenSura® 1-Piece Closed

SenSura® 1-piece closed has an integrated filter which avoids the risk of the pouch ballooning up and causing unnecessary bulges, and neutralises odour. The removal ear makes it easy to remove the adhesive without leaving residue on the skin, allowing for more comfortable pouch changes. The soft backing fabric of SenSura® Closed is strong and water repellent, allowing for easy drying after a wash or swim.

SenSura® 2-Piece Closed

SenSura® Flex

SenSura® Flex Closed is fixed securely to the SenSura double-layer adhesive baseplate by a strong adhesive coupling system. The adhesive coupling is flexible, allowing freedom of movement and making it comfortable and discreet to wear. The pouch can be removed from the SenSura® double-layer baseplate, allowing the pouch to be changed more often than the adhesive baseplate.

SenSura® Click

SenSura® Click 2-piece combines the unique double-layer adhesive with a removable ostomy bag. The bag is connected to the base plate by a mechanical click-lock coupling system which is leak proof and secure. The simplicity of SenSura® Click 2-Piece enables minimal pressure and can be removed with an easy "up-and-over" motion.

SenSura® Drainable Bags

SenSura® 1-Piece Drainable with Hideaway

To change the pouch, the whole appliance is removed and replaced. SenSura® 1-piece drainable is available with flat or convex baseplates. The broad assortment consists of various pre-cut or hole sizes which can be customised, with pouches in a variety of sizes available in transparent or opaque colour.

SenSura® 2-Piece Drainable with Hideaway

SenSura® Flex

SenSura® Flex has a soft, flexible coupling combined with a floating flange that adjusts to individual body contours, while ensuring a stable position of the pouch. It has the flexibility of a one-piece, while providing the advantages of a two-piece. The secure coupling system is conveniently flat without hard elements, making it discreet and easy to handle.

SenSura® Click

A secure two-piece mechanical coupling, with an audible click for extra reassurance. SenSura® Click provides a gentle application by minimising pressure on the abdomen, through smooth coupling of pouch to the baseplate. A click sound provides an audible guarantee for secure locking of the pouch to the baseplate.

SenSura® Urostomy Bags

SenSura® 1-Piece Urostomy

With SenSura® 1-piece urostomy, the SenSura® double-layer adhesive is permanently fixed to the pouch. To change the pouch, the whole appliance is removed and replaced. SenSura® 1-piece urostomy is available with flat or convex baseplates. The broad assortment consists of pouches in a variety of sizes available in transparent or opaque colour.

SenSura® 2-Piece Urostomy

SenSura® Flex

SenSura® Flex is a two-piece appliance with adhesive coupling, providing the benefits of a one-piece – the unique combination of security and flexibility. The pouch is fixed securely to the SenSura® double-layer adhesive baseplate by a strong adhesive coupling system. The adhesive coupling is flexible, allowing freedom of movement, making SenSura® Flex comfortable and discreet to wear. The pouch can be removed from the SenSura® double-layer baseplate, allowing the pouch to be changed more often than the adhesive baseplate.

SenSura® Click

SenSura® Click urostomy has a range of features designed to offer comfort and discretion. A non-return valve prevents the urine from washing over the stoma, reducing the risk of urinary infections. It has a soft tuck-away outlet which is easy to use and can be tucked away when not in use. This prevents it from rubbing on your leg, offering more comfort and discretion. It is divided into multichambers which spread the urine evenly within the pouch. This allows it to have a flat and discreet profile and reduces splashing sounds.

SenSura® Baseplates

SenSura® Standard Baseplate

The original adhesive for optimal skin friendliness.

Available in SenSura® Click and Flex.

SenSura® Convex Baseplate

The oval shape of the SenSura® Convex baseplate is designed to help a stoma that is difficult to manage, for example, a stoma that is flush, retracted, or located in a skin fold. It applies light and directed pressure on the peristomal skin to reduce the risk of leakage by allowing the stoma to protrude. Available in SenSura® Click and Flex.

SenSura® Xpro Baseplate

SenSura® Xpro is more erosion resistant than SenSura®. It is composed of adhesive which provides a fast and secure adherence that stays intact when exposed to aggressive output. It also protects the skin from aggressive output. Available in SenSura® Flex.

It is important to get a snug fit. Every body is unique and some stomas need extra support. That is why we are introducing **SenSura Convex Deep**.

SenSura (flat)

SenSura Convex Light

SenSura Convex Deep

Inward body profile

SenSura Convex range is designed to manage stomas in inward peristomal areas.

SenSura Convex Light provides support for peristomal skin to help make the stoma protrude.

The new SenSura Convex Deep is designed for users who need a deeper curve to help make the stoma protrude.

SenSura[®]

Hospital Assortment

SenSura® Mio SenSura®

NEW

SenSura® Mio

1-piece High Output appliance – for ileostomy patients and post-operative use

Only SenSura® Mio appliances feature BodyFit Technology® for security and comfort.

Now your patients can benefit from day one.

0.1

A broader range means everyone can find a SenSura® Mio that's right for their needs

Like all SenSura® Mio appliances, the new additions feature BodyFit Technology® to provide a secure and comfortable fit, no matter your patients' body shapes. The unique elastic adhesive follows the body's movements when bending and stretching, giving wearers the confidence to do more.

The advantages of the NEW SenSura® Mio 1-piece High Output appliance:

Effective drainage through soft outlet. Connects to different night bags ensuring fewer appliance changes during the night.

Choose a flat or Convex baseplate, depending on the level of support your patient's stoma requires.

Available in both 70mm and 100mm for large and complicated stomas.

Scale on transparent bags provides visual indication of output volume in the bag.

Why all SenSura® Mio appliances give patients the *confidence to do more*

A unique elastic adhesive

The elastic adhesive follows the body's movements when bending and stretching. The adhesive also provides the tack, adhesion and water absorption to cope with more aggressive output.

Discreet material

The smooth all-textile material makes it seem less like a medical appliance and more like a clothing item or accessory. Its specially chosen neutral colour is designed to stay unnoticed under all clothing colours – even white.

A filter your patients can trust

Each appliance has a specially developed full-circle pre-filter that provides greater protection against clogging. It is proven to reduce incidents of ballooning by 61%.

SenSura® Mio

2-piece High Output appliance – for ileostomy patients and post-operative use

Only SenSura® Mio appliances feature BodyFit Technology® for security and comfort.

Now your patients can benefit from day one.

A broader range means everyone can find a SenSura® Mio that's right for their needs

Like all SenSura® Mio appliances, the new additions feature BodyFit Technology® to provide a secure and comfortable fit, no matter your patients' body shapes. The unique elastic adhesive follows the body's movements when bending and stretching, giving wearers the confidence to do more.

The advantages of the NEW SenSura® Mio 2-piece High Output appliance:

Available with a mini High Output bag for extra discretion when transitioning to the community.

Effective drainage through either drainable outlet or soft drainable outlet.

Choose a flat or Convex baseplate, depending on the level of support your patient's stoma requires.

Scale on transparent bags provides visual indication of output volume in the bag.

Click coupling

Click - mechanical coupling The Click coupling features a special lock-ring that makes a reassuring 'click' sound when correctly attached to the baseplate.

SenSura® Post-Op bags

Post-operative Care

SenSura® post-op makes it possible for ostomates to feel secure right from the start, as it combines the SenSura® double-layer adhesive with the essentials in post-operative care.

For easy access to the stoma

Easy access is provided to the stoma through a window.

For effective drainage

SenSura® post-op bags allow for effective drainage through a soft outlet that connects easily to various night bags.

SenSura® post-op is available in a variety of options to meet diverse post-operative needs:

Sterile and non-sterile pouches, and even a drainable pouch without a window.

For customising appliance fit and for issues such as leakage and skin irritation.

Brava[®]

Brava® Adhesive Remover

Quick and easy removal of adhesives

The adhesive remover that makes a difference

Brava® Adhesive Remover lessens the chance of trauma on the skin by letting you and your patients easily remove the baseplate, leftover residue and any adhesive – without compromising the adhesion of their next appliance.

Brava® Adhesive Remover is available as a spray and also as a convenient wipe.

Sting-free

As Brava® Adhesive Remover does not contain alcohol, it does not sting upon application.

Skin friendly

Brava® Adhesive Remover contains silicone, which is gentle to the skin. Silicone-based adhesive remover also makes the baseplate easier to remove.

Dries in seconds

No inconvenient delays before your patients are ready to apply a new baseplate.

...and tests suggest that the barrier function of the skin is maintained.¹

Product name	Item number	Unit in package	Volume
Brava® Adhesive Remover spray	120105	1	50ml
Brava® Adhesive Remover wipe	120115	30	-

Brava® Powder

Absorbs moisture to lessen the risk of skin irritation

Prevent skin moisture from causing problems

As well as causing a great deal of inconvenience and discomfort, skin moisture can also counteract the dry surface necessary for the adhesive to work properly. Brava® Powder absorbs moisture, keeping the skin dry and helping to stop skin irritation.

Brava® Powder can be used just around the stoma or under the adhesive.

Protects peristomal skin

Brava® Powder reduces skin irritation related to moist skin.

Helpful and friendly to skin

Brava® Powder helps to prevent red and irritated skin.

Product name	Item number	Unit in package	Size	Volume
Brava Powder	19075	1		25 g

Brava® Barrier Cream

Gentle aid for dry or irritated skin

Easy-to-use and long-lasting skin protection

Brava® Barrier Cream has a moisturising effect that helps to protect against skin irritation issues from when skin comes into contact with output, or when cleaning or removing the appliance.

Brava® Barrier Cream creates a long-lasting shield for the skin that ensures the baseplate adheres to the body. It also creates a long-lasting barrier that shields the skin from further damage from stoma output or adhesives.

No parabens, perfume or alcohol

Brava® Barrier Cream is free of these potential irritants, making it gentle as well as effective.

Does not compromise tapes or adhesives

Brava® Barrier Cream is designed to fit into your patients' appliance change routine. It allows tapes and adhesives to adhere so it does not need to be removed before applying the bag.

Effective moisturising

Because Brava® Barrier Cream moisturises, it helps to manage sore, dry or irritated skin and prevent further damage.

Product name	Item number	Unit in package	Volume
Brava Barrier Cream	120005	1	60 ml

Brava® Belt

Get a better fitting appliance - and more peace of mind

The secure way to a better fit

The Brava® Belt discreetly provides extra security by helping to keep the baseplate in place.

Made of soft and comfortable material, the Brava® Belt comes in both standard and XL sizes that are adjustable to fit almost any body shape.

Simple to wear

The Brava® Belt fits with all SenSura® and Assura® baseplates with belt ears.

There is a special belt for SenSura® Mio baseplates.

Hygienic and reusable

The Brava® Belt is designed to be used multiple times and can be washed at 60 °C or higher.

Help for all body shapes

The Brava® Belt can be particularly useful for those looking for the security of a more stable appliance.

Product name	Item number	Unit in package	Size
Brava Belt	04215	1	Standard
Brava Belt	04220	1	XL
Mio Belt	00423	1	Standard
Mio Belt	00424	1	XL

Brava® Protective Seal

Easy-to-handle defence against leakage

Feel secure with Brava® Protective Seal

If you have problems with leakage or skin irritation, the solution may be to improve the fit of your appliance with Brava® Protective Seal. Use it to create a snug fit around the stoma, or over dips and creases in the skin to seal any gaps between stoma and baseplate.

Designed to protect against leakage

Seals gaps between your stoma and baseplate The seal is easy to shape, so it fits snugly around the stoma and can be applied over uneven skin. It will stay firmly in place yet can be removed easily. Gives you dual-protection

The seal is output resistant so it will protect against the aggressive constituents of output. It also absorbs moisture, which helps to maintain skin health.

Try it and see what it can do for you!

Product name	Product Code	Pack Size	Thickness
Brava® Protective Seal,	120350	30	2,5 mm
18 mm	120450	30	4,2 mm
Brava® Protective Seal,	120370	30	2,5 mm
27 mm	120470	30	4,2 mm
Brava® Protective Seal,	120390	30	2,5 mm
34 mm	120490	30	4,2 mm

Brava® Mouldable Ring

Flexible and durable

Less risk of leakage with a better fit

The most common issues that lead to leakage can be avoided with the Brava® Mouldable Ring. It gives a durable seal between the stoma and the baseplate, preventing output from undermining the adhesive. As well as maintaining a better fit between the stoma and the baseplate, its durability protects the skin against stoma output.

The Brava® Mouldable Ring comes in thicknesses of 2.0 mm and 4.2 mm.

Closes the gap for longer

Your patients can easily mould the Brava® Mouldable Ring into the required body shape so it fits snugly around the stoma and creates a seal between the stoma and baseplate. And because it's so durable it'll work for longer.Hinders loosening

The Brava® Mouldable Ring works excellently over dips, creases and folds – which helps create the even skin surface necessary to prevent the appliance from detaching.

Protects and shields

The Brava® Mouldable Ring absorbs skin moisture and shields against output to keep your patients' skin healthy.

Product name	Item number	Unit in package	Size
Brava Mouldable Ring	120305	30	2 mm
Brava Mouldable Ring	120425	30	4.2 mm

Brava® Paste

Kind on skin, tough on leakage

Durable protection against leakage

Even if your patients have difficult folds and creases in their skin, Brava® Paste helps them to stay on top of leakage issues. Brava® Paste fills out difficult skin contours, maintaining a tight fit between the stoma and the appliance.

Brava® Paste is alcohol free so there is no itching or burning sensation when applying.

No sting

Brava® Paste does not contain alcohol so there is no stinging sensation when it is applied.

Shields skin

Brava® Paste helps to prevent skin issues by protecting against output. It also has a skin-friendly pH level.

Resistant to breaking down or dissolving

Because Brava® Paste is so durable, it keeps working to help skin stay healthy.

Product name	Item number	Unit in package	Size	Volume
Brava Paste	120500	1		60 g

Brava® Protective Seal Convex

Customised convexity for increased protection

Some stomas need a little extra support

For anyone who lives with a stoma, leakage can be a major cause of anxiety – as well as causing skin complications.

Brava® Protective Seal is designed to provide a better fit between the skin and the baseplate and is proven to significantly reduce leakage compared to other seals on the market.¹

However, some stomas need a little extra support and that's why we created **Brava Protective Seal Convex**. It provides customised convexity to support patients with flush or retracted stomas – helping them to live active, healthy lives.

New Brava Protective Seal Convex The new Brava Protective Seal Convex is designed to protect the skin against leakage and can be used to support flush or retracted stomas and patients with folds, creases or scarring around their stoma. Brava Protective Seal adhesive • High tack and fills even the smallest creases • Skin friendly adhesive SenSura [®] Mio adhesive • Erosion resistant adhesive towards the stoma • High flexibility to ensure protective seal during body movement Designed for a perfect fit • Steep sides designed to provide convexity to peristomal area • Thin edges fit snugly around peristomal area Shapable with sustained hold • Shapable to fit individual stoma shapes, including oval and loop · Sustains convexity after shaping

81% of users prefer Brava Protective Seal over their current seal.²

Customised convexity for increased protection

Brava® Protective Seal Convex provides customised convexity to support patients with flush or retracted stomas. The steep sides are designed to provide convexity to the peristomal area, while the double adhesive layers help protect against leakage and at the same time, is designed to reduce the moisture of the skin to maintain a good pH balance.

How the Brava Protective Seal Convex works

Brava Protective Seal Convex is placed around the stoma. The double adhesive layers adhere securely to the skin.

The shape is designed to provide convexity to the peristomal area.

Customise your solution

Brava® Protective Seal Convex comes in an extensive range of sizes that can be matched to individual needs. It can also be formed around all stoma shapes, while sustaining it's convexity.

Round or oval stoma?

Shapable for different stomas, including into ovals for loop or temporary stomas.

Mix and match

5 mm intervals provide an easy to match sizing with SenSura Mio.. Can also be used in combination with flat baseplates.

Sizing for the perfect fit

Brava Protective Seal Convex is available in six sizes with 5 mm intervals.

Brava Protective Seal Convex assortment list

Brava® Strip Paste

The filler that improves peristomal skin

A tight seal despite scars and folds

The human body rarely provides stoma patients with the ideal surface for an appliance. Natural contours of the skin can lead to adhesion and leakage issues. Brava® Strip Paste can fill out even creases and deep folds, absorbing moisture and creating an even surface for the baseplate. This gives a better seal between the baseplate and skin, which helps reduce the risk of leakage.

Flexible, durable and strong

Stoma users can be worried that their skin surface is too uneven or moist to create a strong seal. Brava® Strip Paste helps improve the peristomal skin. All that is necessary to do is to tear off the required length of strip and mould it into the required shape.

Product name	Item number	Unit in package
Brava Strip Paste	026555	10

Brava® Elastic Tape

Appliance security for all shapes and sizes

Soft elastic tape gives extra security by keeping the appliance more stable

Skin creases, folds and moisture all have a negative effect on keeping your patients' baseplate in place. By following body shape and movement, Brava® Elastic Tape keeps the baseplate secure. It also prevents the edges of the baseplate from lifting and rolling.

Brava® Elastic Tape comes in a variety of shapes to fit various body profiles and types of adhesives. The range also includes Brava® Elastic Tape Straight for square baseplates and Brava® Elastic Tape Belt, which provides extra support for outward areas such as a hernia.

More freedom

Brava® Elastic Tape is developed with new BodyFit Technology®. This means greater security, longer wear time by preventing the baseplate edges from lifting – and more freedom of movement for your patients.

Durable and skin friendly

Brava® Elastic Tape absorbs moisture, which makes the baseplate adhesive less prone to detach from the skin.

Flexible usage

Patients can use one, two or more pieces depending on how much security and support they require.

Product name	Item number	Unit in package
Brava Elastic Tape	120700	20
Brava Elastic Tape Belt	120720	20
Brava Elastic Tape Straight	120740	20

Brava® Protective Sheet

An extra layer of skin protection

Gentle peristomal skin protection

Patients with moist skin are often vulnerable to skin maceration and its attendant discomforts. The skin-friendly Brava® Protective Sheet is used under the baseplate, providing extra absorption in addition to the existing ostomy solution.

The Brava $^{\otimes}$ Protective Sheet comes in a variety of sizes to fit different body shapes and needs.

Creates a solid foundation

The Brava® Protective Sheet helps to avoid skin issues by keeping skin dry and providing a ready surface for applying a new appliance.

Product name	Item number	Unit in package	Size
Brava Protective Sheet	032105	10	10x10 cm
Brava Protective Sheet	032155	5	15x15 cm
Brava Protective Sheet	032205	5	20x20 cm

Brava® Skin Barrier

An invisible friend for the skin

Shields against output and adhesives

Leakage and adhesives can cause patients a variety of skin problems. Brava® Skin Barrier leaves a thin breathable film on the skin that protects against potential damage but does not affect the adhesion of the next appliance.

The Brava® Skin Barrier is a silicone-based product so it does not sting when applied. It comes as a spray and a practical travel-friendly wipe.

Prevents residue build-up

When your patients use Brava® Skin Barrier, residue either comes off when removing the adhesive or by gentle cleaning. This means it does not build up on the skin over time.

Dries in seconds

With Brava® Skin Barrier, your patients will be ready to apply a new adhesive almost immediately.

Product name	Item number	Unit in package	Volume
Brava Skin Barrier spray	120205	1	50 ml
Brava Skin Barrier wipe	120215	30	-

Brava® Lubricating Deodorant

Multi-lubricating effect

Deodorant and lubrication in one

Odour from the output or output gathering around the stoma is a challenge for many patients. Specially designed to be used inside the bag, Brava® Lubricating Deodorant helps against odour when changing or emptying an appliance, while the multi-lubricating effect makes it

easier for output to go to the bottom of the bag.

Brava® Lubricating Deodorant comes in a 240 ml bottle and an easy single-use sachet, which is ideal for patients who are away from home.

Smooth removal and emptying

As well as making the bag easier to empty, Brava® Lubricating Deodorant's multi-lubricating effect also helps to keep the content at the bottom of the bag rather than around the stoma.

Bag seal and adhesive still strong

Brava® Lubricating Deodorant is optimised for use with ostomy appliances so it does not degrade bag seals or affect the function of the adhesive and bag.

Skin friendly

Although Brava® Lubricating Deodorant is designed to be applied inside the ostomy pouch, it is a skin-friendly product so there are no issues with it coming into contact with skin.

Product name	Item number	Unit in package	Size	Volume
Brava Lubricating Deodorant	120610	1		240 ml
Brava Lubricating Deodorant	120600	20	Small	7.5 ml

Fistula and Wound Management System

Environmental and disposal information

Composition of product

- Ethylene vinylacetate EVA
- Polyethylene PE
- Styrene-ethylene-butadiene-styrene SEBS
- Polyethylene foam PE
- Polyvinylidene chloride PVdC
- Polyester PET
- Polyolefin PO
- Adhesive
- · Potato starch
- Pigment
- Activated carbon
- Methylparaben
- Ethylparaben

Accessory - PUMP

- · Polyoxymethylene POM
- Polypropylene PP
- Polyisoprene PI

Accessory - Cover sheet, tracing guide

- Ethylene vinylacetate EVA
- Polythylene PE

Accessory - CLAMP

• Polypropylene - PP

Composition of packaging

The retail and transport boxes are made of cardboard.

- · Carrugated cardboard
- Polyester PET
- Polythylene PE

Notes

Coloplast® develops products and services that make life easier for people with very personal and private medical conditions.

Working closely with the people who use our products, we create solutions that are sensitive to their special needs. We call this intimate healthcare.

Our business includes ostomy care, urology and continence care and wound and skin care.

We operate globally and employ more than 8,500 people.
