

# Intermittent catheter product catalogue

Setting the standard in  
continence care

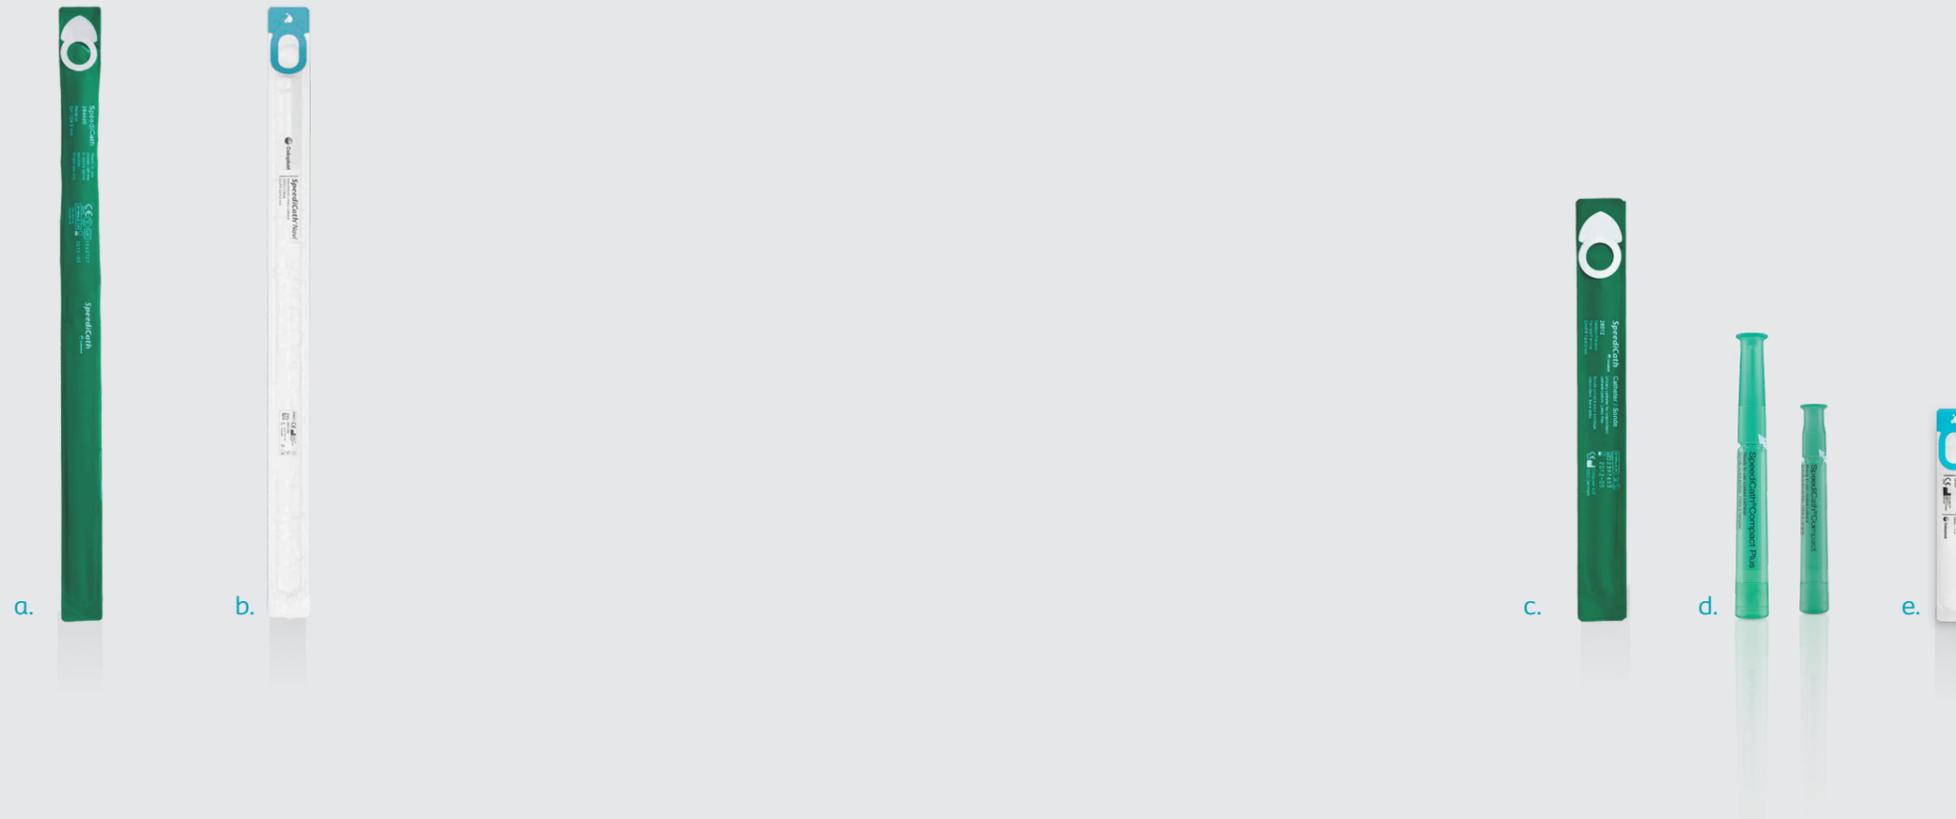

We didn't invent  
the catheter. We  
just **constantly**  
**reinvent** it.

When it comes to the design of any intermittent catheter, our starting point is always users' needs. The commitment to understanding the daily lives of the people who use our products helped us discover the important connection between design and product satisfaction when it comes to improving compliance.<sup>1</sup>

We know that when people have a product they are confident in using, and which suits their lifestyle, they are more likely to use it. This approach has helped us set the standard of catheter design and performance for over 20 years and while we'll never pretend to understand all your patients' needs, we'll never stop trying to meet them.

# Our range, your choice

## For men

- a. SpeediCath Standard Male**  
The proven standard catheter

- b. SpeediCath Navi**  
The first catheter with an insertion grip and a flexible tip

## For women

- c. SpeediCath Standard Female**  
The proven standard catheter

- d. SpeediCath Compact Female**  
The most compact female catheter in our range

- e. SpeediCath Short**  
A more discreet and convenient catheter

# The gold standard of Intermittent catheters

## SpeediCath® Compact

The most compact female catheter in our range

No bigger than a lipstick, SpeediCath Compact Female was a revolution in catheter design when it was launched. Still one of the most popular catheters in the SpeediCath range, it continues to set the standards for design and performance.

### The benefits of SpeediCath Compact Female

- Comes with Triple Action Coating Technology, which stays bonded, smooth and hydrated for reduced friction
- Improves quality of life related to Intermittent catheterisations
- Compact, discreet design
- Available with extra length

## SpeediCath® Short

A catheter designed for the female anatomy while also discreet to fit into everyday life.

SpeediCath Short female has all the clinically documented benefits of SpeediCath Standard in a convenient, shorter\*\* and ready-to-use, discreet catheter. It's a catheter that can easily be integrated into everyday life and is easy to bring along.

### The benefits of SpeediCath Short

- Triple Action Coating Technology™: Enables the coating to stay bonded, stay smooth and stay hydrated for the protection of the urethra and enables reduced risk of urinary tract infection<sup>10</sup>.
- Modern packaging design: The white packaging with a pop of turquoise does not look like a medical product and is developed for discretion.
- More discreet and convenient: Making it easy to store and bring along. Due to shorter\*\* dimensions: Packaging: 19cm, Effective length: 8cm, Full catheter length: 12cm, Available in sizes: CH10-16.

## SpeediCath® Standard Male & Female

The proven standard catheter

SpeediCath Standard is the first instantly ready to use hydrophilic-coated catheter and has been setting the standards for over 20 years. It is the proven choice.

### The benefits of SpeediCath Standard Male & Female

- Comes with Triple Action Coating Technology, which stays bonded, smooth and hydrated for reduced friction
- Available in all sizes including paediatric
- Available both with nelaton and Tiemann tip
- Easy opening with ring-pull feature
- Adhesive dot for placement

## SpeediCath® Navi

The first catheter with an insertion grip and a flexible tip

The flexible tip and the softness of the catheter aid gentle insertion and smooth passage through the natural curves and bends of the male urethra.

### The benefits of SpeediCath Navi

- Designed to promote clean catheterisation.
- Supports easy handling and stepwise insertion without touching the tip or catheter.
- Uniform hydrophilic coating covers the catheter and eyelets for smooth insertion and withdrawal, with minimal friction.

# Smooth and instantly ready to use

Triple Action Coating Technology is a hydrophilic coating that reduces friction on the urethra\*, and which:

**Stays bonded** for an even coating without dry spots

**Stays smooth** to ensure low friction on the urethra

**Stays hydrated** so it's instantly ready to use

\* compared to uncoated catheters

Conveen® range of bags

# Conveen has day and night covered

Conveen urine collecting bags are designed to meet patients' needs and make them feel secure and confident day and night. Bags come in capacities of 0.5 L, 0.75 L, 1.5 L and 2 L.

Patients wear the smaller capacities on the thigh or calf during the day at home or when out and about, while the 1.5 L and 2 L bag can be placed by the bed or hung for convenient urine collection overnight.

Conveen urine bags feature an anti-leak design, which helps make the patient feel secure. Once the bag is full, it can be emptied by the patient.

The urinebags are designed to ensure they are less visible when worn under light coloured clothing, while odours are also contained for additional discretion. A reduced risk of direct contact with urine.

Can be used in combination with intermittent catheter

# PRODUCT OVERVIEW

**GO FOR  
GOLD**

## SpeediCath® range for men

Product name	Catheter length	Size (CH)	Items per box	Product code	Nappi code
<b>SpeediCath® Navi</b>
